

Post-Safety Production Acceptance Benchmark

Run label: Task 11 Rejected Candidate Diagnostics

0.275s

median production latency

warmup excluded

5.377s

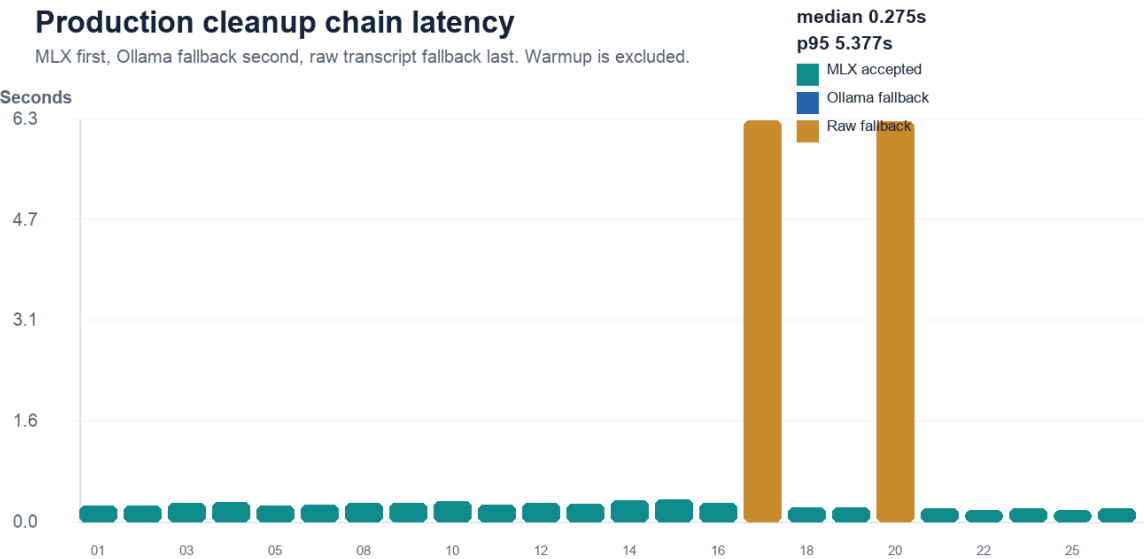

p95 production latency

24 samples

22/0/2

path split

MLX/Ollama/raw

Executive Summary

This run measures the production cleanup chain after one warmup inside a single process: MLX first, Ollama fallback second, and raw transcript fallback last. Manual review remains required before changing the default provider.

Sample Results

The PDF shows the first six samples. The complete table is in report.md and production-acceptance.json.

ID	Latency	Path	Final text
01	0.244s	mlx	I think we should ship it Friday.
02	0.249s	mlx	Yeah, basically the dashboard is broken again.
03	0.287s	mlx	Can you send me the link to that doc?
04	0.301s	mlx	So I was thinking maybe we grab lunch after standup.
05	0.256s	mlx	Let's move the meeting to three thirty instead.
07	0.268s	mlx	I mean, it's probably a caching issue.

Rejected Attempt Diagnostics

The complete raw and sanitized candidates are preserved in report.md and production-acceptance.json.

ID	Provider	Latency	Outcome	Reason	Candidate
17	mlx	0.259s	rejected	protectedMarkerLoss	Yeah, the new hire starts next Monday.
17	ollama	6.012s	timeout	requestTimedOut	
20	mlx	0.259s	rejected	addedMeaningToken	Okay, uh, long story short, we missed the deadline by two
20	ollama	6.004s	timeout	requestTimedOut
